MATERIALS CHEMISTRY AND PHYSICS

Subject Index of Volume 38

Acid leaching refining
the structural effect on the kinetics of acid leaching refining of Fe-Si alloys, 342
Ageing effect
ageing effect on the thermoluminescence of x-irradiated yttrium doped KBr crystals, 301
Aluminium
correlation between the thickness and the specific mass of an anodization layer on aluminium and the measured current transient, 169
synthesis of YAG:Cr phosphors by precipitation from aluminum and yttrium sulfate solutions, 175
mercury implanted into aluminium: enhancement of the substitutional fraction by pre-implantation of kryption, 181
valence and conduction band-edges-charge densities in $Fa_{1-x}Al_xP$ mixed crystals, 243
the coarsening of silicon particles in a submicron-grained layer-deposited Al-12wt%Si alloy, 258
Anatase
sol-gel derived anatase TiO_2: morphology and photoactivity, 277
Anodization layer
correlation between the thickness and the specific mass of an anodization layer on aluminium and the measured current transient, 169

Band gaps
pressure dependence of band gaps in GaAs, GaP, InP, and InAs, 162
Bismuth oxide
the influence of Bi_2O_3 non-stoichiometry on the non-linear property of ZnO varistors, 267
Bismuth vanadate
dielectric, thermal and pyroelectric properties of ferroelectric bismuth vanadate single crystals, 406

Cadmium
characterization of CdS-Bi_2S_3 pellets prepared by co-precipitation method, 393
Calcium phosphate catalysts
isopropanol decomposition over cobalt-substituted calcium phosphate catalysts, 94
Cassiterite
wettability of cassiterite in presence of sodium dodecyl sulphate, 225
CdS-Bi2S3 pellets
characterization of CdS-Bi_2S_3 pellets prepared by co-precipitation method, 393
Channeling implants
channeling implants in silicon crystals, 105

Charge densities
valence and conduction band-edges-charge densities in $Fa_{1-x}Al_xP$ mixed crystals, 243
Coarsening
the coarsening of silicon particles in a submicron-grained layer-deposited Al-12wt%Si alloy, 258
Cobalt
crystallization of amorphous $CoSi_2$ thin films. I. Kinetics of nucleation and growth, 250
Copper
a study of crystallization kinetics in semiconducting glassy alloy $Cu_{0.10}As_{0.45}Te_{0.45}$, 74
Crystallization
crystallization of amorphous $CoSi_2$ thin films. I. Kinetics of nucleation and growth, 250
Crystallization kinetics
a study of crystallization kinetics in semiconducting glassy alloy $Cu_{0.10}As_{0.45}Te_{0.45}$, 74
Cupric oxides
high-frequency studies of the 230 K-anomalies in some cupric oxides, 21
Current transients
correlation between the thickness and the specific mass of an anodization layer on aluminium and the measured current transient, 169
CVI carbon
interfacial morphology of PAN-CVI carbon-carbon composite, 102

Decomposition
isopropanol decomposition over cobalt-substituted calcium phosphate catalysts, 94
Diamond
characterization of diamond synthesized with halogenated methane in a microwave discharge, 131
Dielectric behaviour
growth, microhardness and dielectric behaviour of $NaSbF_4$ and Na_2SbF_5 crystals, 63
Dielectric constant
dielectric constant dependence of Poole-Frenkel potential in tantalum oxide thin films, 297
Dielectric properties
dielectric, thermal and pyroelectric properties of ferroelectric bismuth vanadate single crystals, 406
Dielectric thin films
dielectric $(Pb_{0.91}La_{0.09})(Mg_{0.25}Nb_{0.40}Ti_{0.35})O_3$ thin films on Pt/Ti electrodes prepared by r.f. magnetron sputtering, 369

Electrical ceramics
sol-gel processing of electrical and magnetic ceramics, 305

Elsevier Science S.A.

Electrical characterization
X-ray and electrical characterization of $NaSb_2F_7$ single crystals, 337
Electroless nickel deposits
wetting behavior between solder and electroless nickel deposits, 33
Electrosynthesis
studies on electrosynthesis of Sm-Se films, 325
Emission
studies of the emission of $SrCl_2$-Tl single crystals, 91
EPR spectra
EPR spectra of nanocrystalline composite oxide $LaFeO_3$ with the perovskite structure, 157
Europium
the infrared spectroscopy, electrical conductivity and Seebeck coefficient of $Eu_{1-x}Sr_xCoO_{3-y}$ perovskites, 377

Ferro-silicon alloys
the structural effect on the kinetics of acid leaching refining of Fe-Si alloys, 342
Ferroelectric single crystals
dielectric, thermal and pyroelectric properties of ferroelectric bismuth vanadate single crystals, 406
Flame-resistant fibers
preparation of flame resistant fibers from polyacrylonitride fibers, 289
Fracture toughness
hydrogen transport and fracture toughness of case hardened steel, 234

Gallium
ordering effects in MOCVD grown $Ga_{0.5}In_{0.5}P$ on misoriented (100) GaAs, 50
pressure dependence of band gaps in GaAs, GaP, InP, and InAs, 162
planar InGaAsP/InP photoelastic waveguides with low propagation loss, 195
valence and conduction band-edges-charge densities in $Fa_{1-x}Al_xP$ mixed crystals, 243
Gallium arsenide
ordering effects in MOCVD grown $Ga_{0.5}In_{0.5}P$ on misoriented (100) GaAs, 50
growth and characterization of strained GaP films and strained-barrier GaP/GaAs/GaP quantum wells on GaAs substrates, 69
pressure dependence of band gaps in GaAs, GaP, InP, and InAs, 162
GaP
growth and characterization of strained GaP films and strained-barrier GaP/GaAs/GaP quantum wells on GaAs substrates, 69
Garnet
synthesis of YAG:Cr phosphors by precipitation from aluminum and yttrium sulfate solutions, 175
Grain boundary effect
grain boundary effect in polycrystalline InP films from optical reflectance measurements, 81
Growth
growth, microhardness and dielectric behaviour of $NaSbF_4$ and Na_2SbF_5 crystals, 63
growth and characterization of strained GaP films and strained-barrier GaP/GaAs/GaP quantum wells on GaAs substrates, 69

Hafnium
channeling studies of Hf implanted into TiO_2 single crystals: Lattice disorder and lattice location, 284
Halogenated methane
characterization of diamond synthesized with halogenated methane in a microwave discharge, 131
Heterojunction field-effect transistors
heterojunction ZnSe/InP field-effect transistor by metal-organic chemical vapor deposition, 398
Hydrogen gas
effect of hydrogen gas on the mechanical properties of a zirconium alloy, 138
Hydrogen transport
hydrogen transport and fracture toughness of case hardened steel, 234

Indium
ordering effects in MOCVD grown $Ga_{0.5}In_{0.5}P$ on misoriented (100) GaAs, 50
pressure dependence of band gaps in GaAs, GaP, InP, and InAs, 162
planar InGaAsP/InP photoelastic waveguides with low propagation loss, 195
InP
grain boundary effect in polycrystalline InP films from optical reflectance measurements, 81
Interfacial morphology
interfacial morphology of PAN-CVI carbon-carbon composite, 102
Intermetallic compounds
microstructural evolution of $Ni_{40}Zr_{60}$ alloy during early stage of mechanical alloying of intermetallic compounds $NiZr_2$ and $Ni_{11}Zr_9$, 199
Ionic transport
kinetics of anodic oxide-film growth on tin: ionic transport across a barrier in the high-field limit, 55
Iron
the structural effect on the kinetics of acid leaching refining of Fe-Si alloys, 342
Isopropanol
isopropanol decomposition over cobalt-substituted calcium phosphate catalysts, 94

KBr crystals
ageing effect on the thermoluminescence of x-irradiated yttrium doped KBr crystals, 301
Krypton ions
mercury implanted into aluminium: enhancement of the substitutional fraction by pre-implantation of kryption, 181

$La_4VBO_{10}:Eu^{3+}$
vibrational spectra and luminescence properties of $La_4VBO_{10}:Eu^{3+}$, 363
LaFeO3
XPS study on O(1s) and Fe(2p) for nanocrystalline composite oxide $LaFeO_3$ with the perovskite structure, 355
Lanthanum
dielectric $(Pb_{0.91}La_{0.09})(Mg_{0.25}Nb_{0.40}Ti_{0.35})O_3$ thin films on Pt/Ti electrodes prepared by r.f. magnetron sputtering, 369
EPR spectra of nanocrystalline composite oxide $LaFeO_3$ with the perovskite structure, 157
Lattice disorder
channeling studies of Hf implanted into TiO_2 single crystals: Lattice disorder and lattice location, 284
Lattice location
channeling studies of Hf implanted into TiO_2 single crystals: Lattice disorder and lattice location, 284

Lead
dielectric $(Pb_{0.91}La_{0.09})(Mg_{0.25}Nb_{0.40}Ti_{0.35})O_3$ thin films on Pt/Ti electrodes prepared by r.f. magnetron sputtering, 369
Luminescence properties
vibrational spectra and luminescence properties of $La_4VBO_{10}:Eu^{3+}$, 363

Magnesium
dielectric $(Pb_{0.91}La_{0.09})(Mg_{0.25}Nb_{0.40}Ti_{0.35})O_3$ thin films on Pt/Ti electrodes prepared by r.f. magnetron sputtering, 369
Magnetic ceramics
sol-gel processing of electrical and magnetic ceramics, 305
Mechanical alloying
microstructural evolution of $Ni_{40}Zr_{60}$ alloy during early stage of mechanical alloying of intermetallic compounds $NiZr_2$ and $Ni_{11}Zr_9$, 199
Mechanical properties
effect of hydrogen gas on the mechanical properties of a zirconium alloy, 138
Mechanochemical treatment
charges of yttrium-aluminium garnet by thermal and mechanochemical treatment, 383
Mercury
mercury implanted into aluminium: enhancement of the substitutional fraction by pre-implantation of kryption, 181
Metal/semiconductor interfaces
recent developments in some metal/semiconductor and superlattice interfaces, 1
Microbending losses
thermally induced microbending losses in double-coated optical fibers at low temperature, 187
Microelectronics
SIMS and microelectronics, 203
Microhardness
growth, microhardness and dielectric behaviour of $NaSbF_4$ and Na_2SbF_5 crystals, 63
Microwave discharge
characterization of diamond synthesized with halogenated methane in a microwave discharge, 131
Morphology
sol-gel derived anatase TiO_2: morphology and photoactivity, 277

Nanocrystalline composite oxides
EPR spectra of nanocrystalline composite oxide $LaFeO_3$ with the perovskite structure, 157
Nanocrystals
XPS study on O(1s) and Fe(2p) for nanocrystalline composite oxide $LaFeO_3$ with the perovskite structure, 355
NaSb2F7 single crystals
X-ray and electrical characterization of $NaSb_2F_7$ single crystals, 337
Nickel
microstructural evolution of $Ni_{40}Zr_{60}$ alloy during early stage of mechanical alloying of intermetallic compounds $NiZr_2$ and $Ni_{11}Zr_9$, 199

Optical fibers
thermally induced microbending losses in double-coated optical fibers at low temperature, 187
Ordering effects
ordering effects in MOCVD grown $Ga_{0.5}In_{0.5}P$ on misoriented (100) GaAs, 50
Oxide-film growth
kinetics of anodic oxide-film growth on tin: ionic transport across a barrier in the high-field limit, 55

PAN-CVI composites
interfacial morphology of PAN-CVI carbon-carbon composite, 102
Perovskites
the infrared spectroscopy, electrical conductivity and Seebeck coefficient of $Eu_{1-x}Sr_xCoO_{3-y}$ perovskites, 377
Phase equilibria
phase equilibria in the system $Y(PO_3)_3$-$NaPO_3$, 87
Photoactivity
sol-gel derived anatase TiO_2: morphology and photoactivity, 277
Physical and chemical modification
methods of simultaneous physical and chemical modification of silica gels, 146
Plasma dissociation
influence of some process variables on plasma dissociation of zircon, 15
Polyacrylonitrile fibers
preparation of flame resistant fibers from polyacrylonitride fibers, 289
Polycrystalline films
grain boundary effect in polycrystalline InP films from optical reflectance measurements, 81
Poole-Frenkel potential
dielectric constant dependence of Poole-Frenkel potential in tantalum oxide thin films, 297
Positron distributions
pressure dependence of positron distribution in Si, 348
Pressure dependence
pressure dependence of positron distribution in Si, 348
Pt/Ti electrodes
dielectric $(Pb_{0.91}La_{0.09})(Mg_{0.25}Nb_{0.40}Ti_{0.35})O_3$ thin films on Pt/Ti electrodes prepared by r.f. magnetron sputtering, 369
Pyroelectric properties
dielectric, thermal and pyroelectric properties of ferroelectric bismuth vanadate single crystals, 406

Resistivity
resistivity in weakly disordered silicides induced by ion implantation, 402
Rutile
channeling studies of Hf implanted into TiO_2 single crystals: Lattice disorder and lattice location, 284

Samarium
studies on electrosynthesis of Sm-Se films, 325
Samarium tartrates
characterization of gel-grown pure and mixed spherulitic crystals of yttrium and samarium tartrates, 332
Selenium
studies on electrosynthesis of Sm-Se films, 325
Semiconducting glassy alloys
a study of crystallization kinetics in semiconducting glassy alloy $Cu_{0.10}As_{0.45}Te_{0.45}$, 74
Silica gels
methods of simultaneous physical and chemical modification of silica gels, 146
Silicide films
resistivity in weakly disordered silicides induced by ion implantation, 402

Silicon
crystallization of amorphous $CoSi_2$ thin films. I. Kinetics of nucleation and growth, 250
the coarsening of silicon particles in a submicron-grained layer-deposited Al-12wt%Si alloy, 258
the structural effect on the kinetics of acid leaching refining of Fe-Si alloys, 342
pressure dependence of positron distribution in Si, 348
Silicon crystals
channeling implants in silicon crystals, 105
SIMS (secondary ion mass spectrometry)
SIMS and microelectronics, 203
Site occupation
a study of site occupation of Eu^{3+} in $Me_2Y_8(SiO_4)_6O_2$ (Me—g, Ca, Sr), 98
Sm-Se films
studies on electrosynthesis of Sm-Se films, 325
Sodium fluoroantimonate crystals
growth, microhardness and dielectric behaviour of $NaSbF_4$ and Na_2SbF_5 crystals, 63
Sol-gel processing
sol-gel processing of electrical and magnetic ceramics, 305
Solder
wetting behavior between solder and electroless nickel deposits, 33
Steel
hydrogen transport and fracture toughness of case hardened steel, 234
Strontium
the infrared spectroscopy, electrical conductivity and Seebeck coefficient of $Eu_{1-x}Sr_xCoO_{3-y}$ perovskites, 377
Strontium chloride
studies of the emission of $SrCl_2$-Tl single crystals, 91
Superconducting-like transitions
High-frequency studies of the 230 K-anomalies in some cupric oxides, 21
Superlattice interfaces
recent developments in some metal/semiconductor and superlattice interfaces, 1
Surface free energy components
surface free energy components of monodisperse zinc sulfide, 42

Tantalum oxide thin films
dielectric constant dependence of Poole-Frenkel potential in tantalum oxide thin films, 297
Tellurium
a study of crystallization kinetics in semiconducting glassy alloy $Cu_{0.10}As_{0.45}Te_{0.45}$, 74
Ternary semiconductor alloys
valence and conduction band-edges-charge densities in $Fa_{1-x}Al_xP$ mixed crystals, 243
Thallium
studies of the emission of $SrCl_2$-Tl single crystals, 91
Thermal properties
dielectric, thermal and pyroelectric properties of ferroelectric bismuth vanadate single crystals, 406
Thermal stresses
thermal stresses in two-layered elastic media, 387
Thermal treatment
charges of yttrium-aluminium garnet by thermal and mechanochemical treatment, 383
Thermoluminescence
ageing effect on the thermoluminescence of x-irradiated yttrium doped KBr crystals, 301
Thin films
crystallization of amorphous $CoSi_2$ thin films. I. Kinetics of nucleation and growth, 250
Tin
kinetics of anodic oxide-film growth on tin: ionic transport across a barrier in the high-field limit, 55
Titanium
Sol-gel derived anatase TiO_2: morphology and photoactivity, 277
channeling studies of Hf implanted into TiO_2 single crystals: Lattice disorder and lattice location, 284
Two-layered elastic media
thermal stresses in two-layered elastic media, 387

Varistors
the influence of Bi_2O_3 non-stoichiometry on the non-linear property of ZnO varistors, 267
Vibrational spectra
vibrational spectra and luminescence properties of $La_4VBO_{10}:Eu^{3+}$, 363

Waveguides
planar InGaAsP/InP photoelastic waveguides with low propagation loss, 195
Wettability
wettability of cassiterite in presence of sodium dodecyl sulphate, 225
Wetting behavior
wetting behavior between solder and electroless nickel deposits, 33

X-ray characterization
X-ray and electrical characterization of $NaSb_2F_7$ single crystals, 337
X-ray photoelectron spectroscopy study
XPS study on O(1s) and Fe(2p) for nanocrystalline composite oxide $LaFeO_3$ with the perovskite structure, 355
X-ray storage phosphors
X-ray storage phosphors in the system Y_2SiO_5:Ce, Tb, Zr, 191

YAG:Cr phosphors
synthesis of YAG:Cr phosphors by precipitation from aluminum and yttrium sulfate solutions, 175
Yttrium
phase equilibria in the system $Y(PO_3)_3$-$NaPO_3$, 87
synthesis of YAG:Cr phosphors by precipitation from aluminum and yttrium sulfate solutions, 175
X-ray storage phosphors in the system Y_2SiO_5:Ce, Tb, Zr, 191
Yttrium silicate oxyapatites
a study of site occupation of Eu^{3+} in $Me_2Y_8(SiO_4)_6O_2$ (Me—g, Ca, Sr), 98
Yttrium tartrates
characterization of gel-grown pure and mixed spherulitic crystals of yttrium and samarium tartrates, 332
Yttrium-aluminium garnet
charges of yttrium-aluminium garnet by thermal and mechanochemical treatment, 383

Zinc
the influence of Bi_2O_3 non-stoichiometry on the non-linear property of ZnO varistors, 267

Zinc sulfide
surface free energy components of monodisperse zinc sulfide, 42
Zircon
influence of some process variables on plasma dissociation of zircon, 15
Zirconium
microstructural evolution of $Ni_{40}Zr_{60}$ alloy during early stage of mechanical alloying of intermetallic compounds $NiZr_2$ and $Ni_{11}Zr_9$, 199
Zirconium alloy
effect of hydrogen gas on the mechanical properties of a zirconium alloy, 138
Zirconium silicate
influence of some process variables on plasma dissociation of zircon, 15
ZnSe/InP field-effect transistors
heterojunction ZnSe/InP field-effect transistor by metal-organic chemical vapor deposition, 398
